

# TEC 40 PRACTICAL APPLICATION 1

## Objective

Working with your team, rig a tec kit so that all equipment conforms with the standardized technical rigging philosophy learned during the knowledge development session and with the environment-specific requirements discussed you reviewed in class.

## Instructions

1. Watch *TecRec Equipment Setup and Key Skills* video.
2. Review rigging for tec kit including deco cylinder with instructor.
3. Work with your team to set up your equipment in an appropriate configuration modeled after the example provided by your instructor.
4. Present your assembled kit with your team to the instructor for review and correct any noted problems.
